

## Chapter 112

Everyone was stunned when they saw the person come in.

Who was this young man? Everyone pondered.

How rude of him!

However, when Director Zhao saw him, a trace of disbelief and horror appeared on his face.

He was from the Li family of Qena City.

He was Tyler Li!

Hugo's eldest grandson!

The chairman of Peaplum Resort!

He was Director Zhao's immediate superior!

Director Zhao was dumbfounded.

Tyler trod over slowly. Everyone was baffled as he gently took the card and swiped it on the machine at the front desk.

Hugo's name appeared on the screen instantly.

When Director Zhao witnessed this, he was frightened and felt a shiver ran down his spine.

This card...

It was real!

Besides that...

It was Old Master Li's personal card!

This...

Compared with the other five cards, this card was way more invaluable.

Other cards represented the friendship of the card owner with the Li family.

William's card however represented the eternal friendship he had with the Li family.

Director Zhao went limp and fell to his knees with a thud. Trembling, he explained, "Chairman Li, I, I didn't know that..."

Tyler put the card into a file in his hand. Gone was the carefree temperament that he carried when he approached them a while ago.

His expression turned extremely ferocious.

"You! Are you going to make my friend a criminal on behalf of the Li family? What action are you going to take? Do you want to kill my grandfather? Or, are you trying to provoke the whole Li family?" Tyler heckled.

Director Zhao was terrified that his face turned pale on the spot.

He finally realized that he had made a blunder!

A huge blunder.

An irreversible blunder!

He despised himself at this moment!

If he had listened to William and took the card to

swipe on the machine, everything would be cleared up.

He was overconfident!

Why was he so senseless?

He should not take advantage of his power and authority!

Why was he so ignorant? How was he so madcap a while ago that he could not see this coming?

Those insulting words that he spat out before had turned into sharp swords that pierced through his own heart at this moment.

"Get out! I never want to see you in Qena City ever again." Tyler's reply was like a death sentence, ruining Director Zhao's life in an instant.

Director Zhao wanted to get up from the ground but realized that he was too weak to stand on his feet.

Tyler signaled two security guards over to carry Director Zhao out.

When Director Zhao passed by William, he couldn't help but shudder again.

William's mysterious existence was the cause of everything that happened on this day.

Director Zhao began to console and even hypnotize himself that he would definitely make William pay for this if they met again in the future.

However, he realized that it was impossible.

This young man in front of him was calm and had high forbearance when it came to affairs as such. Director Zhao was no match for William.

He even got Hugo's personal card. Director Zhao trembled when he imagined how close William and Hugo were.

Director Zhao shook his head and smiled helplessly.

There was no point for him to stay in Qena City anymore. He would leave on this very night before the Li family drove him out.

But when Felicity's ex-classmates at the scene saw that Director Zhao, who was arrogant previously, was carried away ruthlessly, they were all dumbfounded.

No matter how stupid they were, they could tell that William was holding a very powerful and reputable position.

Right, Tyler just said that he was from the Li family.

And he also mentioned that Hugo was his grandfather.

This person was...

What the f\*ck!

Everyone squinted their eyes and wanted to call out Tyler's name, but there was a lump in their

throats.

They didn't deserve to call out the name of the eldest grandson of the Li family.

"William, is he Tyler Li?" Felicity asked William in a low voice.

William beamed and nodded. "Yes, he is."

"How do you know each other? How did you get Hugo's card?" Felicity couldn't help but be curious.

Just as William was about to speak, Tyler came over and chimed in, "Let me explain. Do you remember that William went to my house before this? He did my grandfather a favor. Hence, my grandfather lent him the card."

Tyler tried to explain it as vaguely as he could. He even lied that his grandfather lent William the card.

He was looking out for William. After all, if others knew that William had such a connection, he would be put in a dangerous position. At a single glance, Tyler could tell that those people in front of him were vile.

Felicity nodded her head. "I see. No wonder Old Master Li attended my birthday party. It turns out that he was there because of you."

Felicity was quick and smart. She connected the whole incident to the past in an instant.

"For William's sake, I will spare you all today. Get

out of here!" Tyler was definitely an expert in changing his expression as he coldly ordered the others instantly.

Those people were quivering with fear. They didn't even dare to express their gratitude to Tyler for giving them a second chance before they left the room immediately.

After Tyler saw them leave, he told William, "William, I'm so sorry that such a mess happened in my place. It's so embarrassing."

William waved his hand, indicating that it was fine.

Tyler's character was the same as Baxter from the North Wind Fund.

They both did not have a nice attitude, but they were sensible.

Tyler was the kind of person William should not befriend as Tyler would try to take advantage of William.

William was confident and unafraid of Tyler because he held too many benefits that Tyler wanted.

Tyler would not be able to get all of them even if he spent his whole life doing so.

At this moment, Tyler pulled William aside quietly and handed a car key and the file to William respectfully.

"Brother Lu, this is the Li-lin Co., Ltd. I have changed the name to Felivia Entertainment according to your request. You are the legal representative of the company. Also, this car key is for you. The car is parked at the entrance."

Taking over the file and key, William curled up his lips. "Thank you for your hard work."

Tyler twitched his mouth and asked curiously, "Brother Lu, you used to run a pharmaceutical business. Why do you want to set up an entertainment company?"

William gazed at Tyler with a smile. "You already know the reason. Why are you trying to play dumb in front of me?"

Tyler got goosebumps all over his skin at once.

He couldn't hide a single thought from William.

Was William a prophet? How could he read people's minds so accurately?

"I promised you that the properties of the Li family are yours, and I have a plan for Flavia. You can rest assured; I have it all planned." William shook the file in his hand.

After getting reassurance from William, Tyler nodded respectfully and replied promptly, "Thank you, Brother Lu! If you have anything that you need help with in the future, I will be there any time, and I'll never say no."

When Tyler said this, it never crossed his mind that he had already become one of the many pawns of William.

William was luring Tyler with benefits.

But, at the same time, he made Tyler follow his instruction with wisely structured schemes.

All in all, William was suppressing Tyler without his knowledge.

Outside the lobby, a shuttle bus was the only option for people to leave because the resort was located in a relatively remote location. Plus, it was getting late.

Only a few people drove here themselves. Most of them were still outside, waiting for the shuttle bus.

But they were not merely waiting.

At this moment, they were surrounding a fiery-red Lamborghini. It had caught their attention, keeping them occupied.

They caressed the car and praised it with jealousy occasionally.

"This car is so cool! I'm guessing that it's worth a few million yuan!" A man couldn't help but exclaim.

"If I could go back riding this car, how wonderful would it be!" A girl began to daydream.

"Stop dreaming. Only the rich can afford to drive

this car. Who do you think we are?" Her friend teased her.

"If I was as pretty as Rachel, I might be able to hook up with him and take a ride in this luxury car." Another girl chuckled.

Although this remark was meant to be a joke, Rachel had taken it seriously.

She was standing at the side and began to look forward to seeing the owner to show up.
