

# Chapter 999

She immediately got up and knelt down three times for Elder Shu.

A family of three knows it. Elder Shu is their amulet.

They definitely want to hold this amulet firmly.

Moira just finished kowtow when she saw Lanita crashing to the ground with an 'normal' sound.

Immediately afterwards, her lips were black and the corners of her mouth also vomited blood.

"Lanita! Lanita! What's wrong with you daughter! Lanita!" Moira cried out in a panic.

Jarod also threw on Lanita's body and shouted, "Lanita, my daughter..."

It was Elder Shu who was the most calm: "Prepare the car! Send to the hospital immediately!"

Jarod and Lanita thought of sending Lanita to the hospital. The three of them carried Lanita into the car. The driver drove Lanita directly to the hospital, and then went directly to the emergency room.

I went to the emergency room for more than an hour, but I couldn't see why.

With a sound, Lanita was bruised all over, and she would bleed subcutaneously after a little pinch, but her skin was extremely pale.

After tossing for more than an hour, the tired and panting doctor said to the Lin family of three: "Do a whole body internal and external physical examination laboratory, and wait until the laboratory results come out."

From that moment on, Lanita was pushed to conduct various tests.

In fact, it came out last night.

The doctor regretfully said to Grandpa Shu: "Master Shu, your granddaughter is not suffering from a disease, but she came to see it too late."

Old man Shu stepped back several steps in surprise: "What...what do you mean?"

"She had a blood disease first." The doctor said.

Elder Shu + Jarod + Moira: "..."

Moira immediately cried and said, "Can you still look forward to blood diseases?"

The doctor truthfully replied: "If you get up early, you should be optimistic. Now, her blood disease must be transfused all over. Not only that. There are toxins in her blood!"

"Toxin?" Jarod looked at the doctor puzzled.

"Yes, her kidneys are no longer good."

The doctor regretfully said: "Because her blood disease has not been treated in time, it has affected the kidneys. Now Suzi has been infected with uremia. First, she must have a major exchange of blood all over her body. Second, she needs a kidney transplant!"

After that, the three colleagues of Jarod and Moirashu were shocked.

"Such as...If she doesn't have a kidney transplant, what will happen to her..." Moira asked with a trembling voice.

"She will die." The doctor said simply.

Moira and Jarod both fell to the ground at the same time.

Grandpa Shu also burst into tears suddenly: "My granddaughter, granddaughter! Your mother is dead, and grandfather has finally found you. Why did you get the disease with ease, and you got the two diseases together?"

The doctor reminded: "It's a complication. The first thing she got was a blood disease. The blood disease first affected the kidney, because the kidney is an organ for detoxification."

Elder Shu: "She...if she doesn't get a kidney transplant, how long can she...how long can she live?"

Elder Shu needs to confirm the time, during this time period, to find the kidney source.

"If there is no kidney source, she can live at most one month." The doctor truthfully told Old Man Shu.

## **Chapter 1000**

The doctor's words, like a bolt from the blue, impacted Jarod and Moira.

It even shocked Elder Shu.

Seeing all three of them sitting on the chairs, the doctor only said sympathetically: "The most important thing now is to find the source of the kidney quickly."

Find the source of the kidney quickly.

Where can I find the kidney source in a month?

Old man Shu couldn't sleep all night in sorrow.

He was much older overnight.

Early the next morning, he came to the hospital again to see Lanita awake.

As a result, as soon as I arrived at the hospital, I saw that Lanita was already awake, her face was pale as white paper, and her eyes were like ghosts in her abdomen.

Seeing Elder Shu coming, Lanita rolled down from the hospital bed and hugged Elder Shu's leg: "Grandpa, grandpa, if you save me, please save me. Please help. I..."

Elder Shu tears up all the time: "..."

He wants to save his granddaughter.

Do you want to save it?

He can't find his daughter anymore. In this life and this life, he is separated from his daughter. He finally found his granddaughter. He will certainly save his life. The Shu family is not short of money. As long as money can solve the problem, He will definitely save.

However, for a month, kidney source.

There is a deep despair in Old Man Shu's heart.

"Grandpa, you can save me, you can really save me." Lanita looked at Elder Shu with a nose and tears.

The old man Shu cried tears: "No way, granddaughter, grandpa's kidneys were matched yesterday and they are not good at all. Your parents and grandpa's kidneys have been matched and they can't be used. Grandpa will find it for you as soon as possible. Kidney source..."

"Grandpa, there is one more person, there is another person who can do the matching, and her kidney source may be able to match it." Lanita raised her head and looked at Elder Shu and said.

Elder Shu was puzzled: "There is another person, who can it be?"

Is it possible to have a cousin's kidney?

This way, Mr. Shu will be very embarrassed.

Although Lanita is the granddaughter of his Shu family, but Darius disease does not like this cousin, not only does not like it, but is very disgusting with this cousin.

The only one in the Shu family is Darius, and the other three brothers have settled abroad.

Even if the old man agrees to let Darius do the matching, will Darius agree?

Will his parents agree?

When Lanita came to Shu's house, she never walked with her uncle and aunt, but now she immediately asks her for a kidney.

Elder Shu looked at Lanita embarrassedly.

Lanita said, "No, it's not Brother Darius."

Elder Shu: "..."

It's not Darius, who would it be?
