

The Amazing Son In Law Chapter 3763

Abbas's sudden harsh words made Tianxiao tremble in shock.

He didn't expect that Abbas would be so cruel that he didn't say a word, he wanted to make his family completely irresistible.

Moreover, he also had no doubt about Abbas's attitude. After all, this person was the lord of the Wanlong Palace. In the presence of so many tribes and the Wade Family, he was definitely not just talking.

What's more, all of his identity information and family member information are all recorded in detail on the Wade Family tree, and he can't run away.

Thinking of this, he suddenly said with horror: "Master, I am willing to cooperate! Give up half of the property! Please be merciful..."

Abbas snorted coldly, and asked: "Why? I am afraid now? Didn't you just say that the assets of your family are all your hard-earned money? I thought you were really stubborn and you wanted to die. Come to defend the family property!"

Tianxiao choked and said: "I was confused just now. Don't worry about it. In fact, money is something outside of your body. No matter how confused you are, this truth is clear..."

Abbas said blankly: "Now that you want to understand, then I will give you another chance. If you actively cooperate and take good care of it, Wanlongdian will no longer pursue it. From now on, the well water will not offend the river, but if you dare to play cautiously with me, watch out for me to turn my face at any time!"

Tianxiao's whole body suddenly shuddered, and quickly said: "Don't worry about the Master..."

Abbas ignored him, but said to everyone: "If you want to be safe, just transfer half of your family's assets to Wanlongdian's overseas accounts. As long as you spend money to eliminate the disaster, I Wanlongdian will also abide by its promise and will not pursue it any more."

At this time, everyone expressed their opinions one after another, expressing their willingness to accept the request of the Wanlong Palace.

As soon as Abbas's conversation turned, he said in a stern tone: "But you don't want to fool me Wanlong Temple! After the payment is collected, we will also arrange professional financial auditors to evaluate each of you's family assets. If it is discovered that someone paid less than half of his assets, he must compensate for the difference three times at that time!"

As soon as these words came out, the faces of every branch of the Wade Family were filled with sorrow.

They originally thought that they could completely conceal the actual situation of their own assets.

However, if according to Abbas's statement, even if one billion is given, after Wanlongdian's auditors have assessed their true asset size and found out that they have given three billion less, they will be required to pay three times the amount. Compensation, in that case, the compensation alone might cost 10 billion!

At this time, Tianxiao said tremblingly: "The master of the pantheon...The net assets of the family are about 8 billion yuan, but the total amount of cash stocks that can be transferred is probably only about 2 billion yuan. How should this situation be handled? Woolen cloth?"

Abbas said coldly: "If this is the case, first convert all the stocks into cash, and then transfer all the 2 billion cash to the designated account of Wanlongdian. After you go back, immediately sell some of the others. Assets, pay the remaining 2 billion in place!"

Tianxiao choked and said: "Master, let's not tell you that, many of our industries are long-term investments. Some projects have been invested for many years and invested a lot of money before they finally start to see returns. If it is sold at this time, it will be no different. Yu slaughtered chickens and got eggs, and the loss to us was very heavy..."

Tianxiao's words resonated with other members of the Wade Family's collateral line.

They are already willing to take out half of their assets at this time, but if it is this way of killing chickens to get eggs, the loss to them will be greater than taking out half of their assets.
