

# When His Eyes Opened by Simple Silence

## Chapter 1016

In the Afternoon.

Avery finished her work and drove to Tammy.

Tammy's second psychotherapy today. She looked much more relaxed than the state after the first treatment.

"It's probably because Chelsea died. So I don't hate it so much." Tammy said calmly while drinking coffee, "The psychiatrist told me not to feel inferior because of this. It's because those who inflict pain should feel guilty."

"Well. Didn't you say last time that you wanted to do a manicure? Let's do it together later! I want to paint a color." Avery changed the subject to a lighthearted one.

Tammy looked at her carefully, "When did you start to like to dress up? You are wearing a necklace today. Isn't it because you came to see me? Are you going to have a date with Elliot later?"

Avery couldn't help laughing but said, " Elliot is so busy now that he has no time to eat. Where is he free to date? I never thought that marriage has so many complicated and trivial matters to deal with."

"That's because he has no elders in his family to help him." Tammy In one sentence, the mystery is solved, "Look at the wedding between Jun and I, we basically didn't worry about anything other than setting the menu and the guest list. Generally, when a new couple gets married, their parents will take care of them. You two are better both sides. No parents help."

Speaking of this, Avery was inevitably lost and sad.

"Elliot was drunk the night before yesterday because of this." Avery took a breath, her eyelashes trembling slightly, "Now listening to you, I miss my mother so

much. If she was still alive, she would see me and Elliot is reconciled, and there is another child, she will definitely be happy for me."

"Of course Auntie will be happy for you. Then do you miss your father?" Tammy asked casually.

Tate Industries was founded by Jack Tate, and after bankruptcy, it was rebuilt by Avery.

Although Jack cheated in marriage and did something wrong. He left all his inheritance to Avery before he died, which was regarded as a wave of goodwill.

Avery pondered for a few seconds, then shook her head: "I don't really think so. Because Father hurt my mother too much. If it wasn't for him and Wanda's marriage, our family would never have had such a tragedy. Although I rely on him. The chips left to me have made a lot of money. But if I don't do business, I can live well on my own."

Tammy said here, sighing, "I understand you. I can't accept my father cheating. Fortunately, he has a good relationship with my mother, I haven't seen them quarrel for so many years. I am so vulnerable, but they are so well protected. Avery, I even thought about what happened if you met me! you must have walked out a long time ago."

"But you don't know, before my father died, I lived very carefully in that house. Those years were still painful to think about. Maybe God is fairer and wants everyone to be happy."

"Avery, it's over. We will definitely go well in the future."

"Well. Do you think I should paint my nails pink or clear?" Avery asked.

Tammy laughed, "You can paint both! Who stipulated that each nail should be the same color. Do you think that you can have both fish and bear's paw by painting one nail? You paint ten nails ten times. Any color is fine."

Avery was amused, "I was a little nervous when I got married for the first time. My secretary said that brides usually wear pink, but I think transparent colors are better to match with clothes. Because on the wedding day, I have to change several outfits."

Tammy listened to her words and asked curiously, "How did you and Elliot get married before?"

"At that wedding, apart from fear and fear, I can hardly remember anything else." Avery recalled the details of the wedding many times, but the memory became very vague.

"He was in a vegetative state at the time, so you did your wedding alone?"

"Yes. Elliot was lying on the bed and couldn't move at all." Avery said and remembered something, "I found out that Cole cheated on him that day. Maybe there was some providence, if I didn't see it. Cole cheated on me, and I might have run away from the marriage. If I couldn't escape, I might have done something more violent. I was too young at the time, so I was more impulsive."

"It's dangerous! Cole is a sc\*mbag far worse than Elliot. It's gone!" Tammy broke a cold sweat for her, and at the same time, she said, "You said they are all from Foster family. How can Elliot be so much better than the rest of his family? My husband admires Elliot very much, and so does my father-in-law."

This question, which made Avery's heart sink to the bottom.
