

## Read I Am A Quadrillionaire Chapter 2203

I am a quadrillionaire chapter 2203-After the masked man's announcement, the bidding for the five Elf women came to an end.

David bought them for 250 billion L Dollars.

This price could only be regarded as satisfactory among the first-tier and main cities.

It was not too high but not too low.

However, in Sole, a second-tier city, it was absolutely sky-high.

The tier of a city represented the consumption level of the city.

The forces entrenched in Sole had yet to be able to take out 250 billion casually.

Everyone at the scene was amazed at David's strong financial resources.

In fact, David chose to participate in the auction at the last minute for no other special reason.

It was just a last-minute idea.

Just now, he inadvertently saw the Elf woman in the middle of the cage. Perhaps knowing the fate she was about to face, her eyes showed despair.

David felt that since he could not finish his money anyway, so he decided to help her.

At the end of the day, he could not bear this.

It would be fine if he did not come across this.

Now that he had, this was his fate.

What if he could get lavish points?

It would be okay if he could not get them.

Hundreds of billions of L Dollars were nothing compared to his wealth.

So, he decided to take part on a whim.

His goal was also very simple.

He would buy all five of the Elf women and find a chance to let them go.

That was all!

He would think of this as doing good deeds!

Then, David was taken into the next room and completed the deal with Black Fox.

“Thank you!” Black Fox only said two words.

This was from the bottom of his heart.

After he said that, his anxious heart could finally rest easy.

Only he knew the meaning of those two words.

He was thanking David for buying the Elven Princess and taking the blame for him.

After word of this got out, the powerful Elves would go to David immediately.

Then, what would happen between the Elves and the force behind this man?

Would it be the same as the Alten family from Wier?

Maybe not.

This person spent 250 billion L Dollars without blinking an eye.

So whether it was the wealth under his control or his temperament, they were far from what Soleil and his ilk could come up with.

Maybe the Elves would get into trouble.

Then, Black Fox would be even safer.

No matter what, after today, there would be no more Black Fox.

“You’re welcome!” David only replied with two words.

He had never had a good impression of this kind of person who would buy and sell intelligent life.

The two did not talk much.

Soon David left.

In the process of walking back to the hall, he habitually turned on the system and took a look.

Although he had no expectations, he still had to look, right?

‘Um?’

David’s eyes lit up.

The result was somewhat beyond his expectation.

He had an extra 2500 lavish points in his system!

In other words, the transaction just now was recognized by the system!

Immediately afterward, David felt a burst of regret.

If he knew this was the case, he would have increased the price.

The value of these five Elf women would not be as low as 250 billion.

If he added another one or two hundred billion, maybe they could be converted into lavish points.

Now his lavish points had reached 6600.

If only he had worked harder just now, he would have no problem getting 8000 points.

Wouldn’t it be one step closer to 10000?

Once his lavish points broke through the 10000 mark, David could upgrade his Body from Primordial level 10 to Ancestral level 1.
