

Read I Am A Quadrillionaire Chapter 2396

I am a quadrillionaire chapter 2396-Then, they would have threats from the Robotias and the Soul Devourers from the outside and trouble from Lufian on the inside.

With both internal and external troubles, it might be difficult for Leila to get through this crisis.

“Alright, Lufian only has you in his mind and Leila is not as important to him as you are. As long as he doesn’t despair and sees hope, he will be safe for the time being. He has waited for so long so I’m sure he will be fine with waiting a little longer.”

“I understand.” Elora nodded again.

“That’s the situation with Lufian. Now tell me about the benefactor you met in The Spirit Cage. According to my reading, he will change your life. You are one of the five

Leila rulers and I don’t know if this person will affect Leila because I can’t see anything about this person.”

Sylvio expressed his doubts and wanted Elora to answer them for him.

He had used almost all means on Elora’s benefactor, even his unique secret technique, Zwei Arithmetics. However, he only knew that this person existed and nothing else.

So, this aroused Sylvio’s great curiosity.

One must know that even if Lufian hid so well, Sylvio could still get some information about him through Zwei Arithmetics.

Although not everything, it was still a lot.

Zwei Arithmetics was what Sylvio once obtained from a ruin.

It was also the means that Sylvio was most proud of.

It was by relying on Zwei Arithmetics that Sylvio could get to where he was today step by step.

He taught the four Overlords, Lufian, Elora, Valentin, and Drogo everything he knew, hoping that they could protect Leila well.

However, he did not teach anyone Zwei Arithmetics because the requirements for learning Zwei Arithmetics were too high.

Among the four Overlords, only Lufian had that talent. If the other three practice Zwei Arithmetics, it would just be a waste of time, so better that they learn other things.

Yet, Lufian had a dual personality and that was an extremely unstable factor.

If Sylvio taught him Zwei Arithmetics, it might be a disaster rather than a blessing.

So, Sylvio did not dare to gamble either.

If he lost the gamble, the consequences would be disastrous.

Moreover, Zwei Arithmetics was also Sylvio's biggest means of controlling the situation. To be honest, he did not want to spread this as he might lose control of Leila.

"Sylvio when I first entered The Spirit Cage, my body was transformed into a little girl since my soul was severely injured. At that time, I had no memory, and I just relied on instinct to steal treasures everywhere in The Spirit Cage for food until I met him..."

Having said that, a smile appeared on Elora's face.

Seeing Elora's appearance, Sylvio sighed helplessly in his heart.

Lufian's efforts over hundreds of thousands of epochs were ruined.

He did not want to fight for justice for Lufian, but he just thought it was a pity.

Originally, these two people could become an exceptional story that captured the imagination and was spread far and wide.

With Elora by Lufian's side, Sylvio believed that Lufian's violent personality would be utterly suppressed and would never have a chance to see the light of day again.

What a pity!

However, this was often the case with relationships. In the end, the dedication of hundreds or thousands of epochs could not compare to the time spent with another for several years.

Sylvio had been around for far too long so he had seen a lot of this happening.

He also could not judge who was right or who was wrong.

Just when Lufian had been working hard for so long and was about to succeed, something like this happened.

He could only lament that the circumstances were unfavorable to Lufian.

The two were destined to not end up together.
