

The Secret Heir Return To Wealth And Love Chapter 1226

The Secret Heir Return To Wealth And Love Chapter 1226

Chapter 1226

“Almost thirty minutes now, let me do the last one Cory said, lowering his eyelids.

His voice kept reaching George..

Minutes later, George took off his headphones, threw them aside, and began sweating bullets trying to crack that domain

The new question from the math blogger was indeed tough.

Cory took four and a half minutes before he put his pen down and announced a number

The math blogger immediately confirmed it was correct, to the astonishment of everyone in the chat.

Cory glanced at the timer, “Half an hour’s up.”

He had long finished the challenge, while George....

He seemed oblivious to the time, still hammering away at his keyboard in defiance.

The chat kept refreshing.

“Give it a rest, you lost!”

“Ha, he cracked your pride and joy in just seventeen minutes and thirty seconds, and he even left you a domain that you couldn’t crack in half an hour!” “Are you going to stop now? Cory waited for two minutes.

“He’s probably too focused, let me remind him.”

As he said this, he did something on his keyboard.

The original domain interface on George's end suddenly changed. George thought he had cracked it.

But then the screen lit up with the words, "Challenge failed".

Everyone in the chat was in stitches.

The kid said he'd remind him, he really did!"

"Wow, am I the only one who finds this very satisfying? This guy's been insulting the kid and his parents since last night!"

"My God, he has the nerve to call himself an expert? His team's project was cracked by a kid in just a few minutes!"

"It's not just cracking, I think the kid showed great restraint. He said it would be usable after half an hour, I think he could totally take down that module!"

George finally got it.

He saw the sharp comments in the chat and immediately lost his cool.

"You really believe a five and a half-year-old could do this?" George scoffed, "This level of domain, if it wasn't Raleigh and his team, I'll write my name backwards!"

"Can't you take a loss? Can't you take a loss?"

The chat started showing this comment.

Seeing this, George was even more furious.

"What do you mean, can't take a loss? You think it was him who attacked my module? It was obviously his parents who found someone to do it off-stream, he was just putting on a show."

With his words, some in the chat began to waver

“To be honest, when he was typing earlier, no one knew what he was doing at least George recorded his screen all the way...”

“George, just let it go, he’s rich, we can’t compete with them.”

No one left Raleigh’s stream, everyone was chatting

When Cory completed the challenge, Raleigh said, “Today, Tech Seven’s not in top form, actually took seventeen minutes, he usually keeps it under fifteen.”

When George was losing his cool, Raleigh even spoke up for him, “To be honest, this domain Tech Seven picked is really tough. Almost didn’t finish within half an hour last time we competed, it was really close.”

But now, George had failed the challenge.

He vented his anger on the internet.

Could Raleigh bear it?

Raleigh said he couldn’t!

Chapter 1227

“George spouting nonsense again? I’m live streaming here, how can I assist Tech Seven if you don’t have the skills, you need to face the reality of failure. Your low-quality module is like a pile of trash pieced together from everywhere, eight out of ten steps there’s a glitch, do we need to team up with Tech Seven to attack you? Even a half-decent hacker could take down your module in minutes, believe it or not?”

“George is such a chameleon Playing the victim yesterday and mocking Tech Seven today He got utterly demolished by Tech Seven in an online challenge and still won’t admit his mistake, does Tech Seven need to keep proving you wrong? Or should Tech Seven just delete your source code this time?” Another senior engineer also joined in the mockery

Upon hearing this, George was fuming in the live-stream.

“You guys know very well whether he’s Tech Seven or not. My fans are right, I’m not scared of you George said and then laughed. “You deliberately attacked my software, I’ll sue you for the damages caused during this time

The chat was in an uproar

“You’re so shameless We’re in a fair competition, which you agreed to, and now you’re trying to scam them for compensation? Are you going broke?”

“Dam, I just said, kids shouldn’t compete with such shameless people.”

“This guy has really been lowering my expectations non-stop in the past 24 hours.”

“George, I’m a supporter of you, but aren’t you going too far?”

However, after reading the chat, George shrugged it off and said, “He’s loaded, he won’t care about this money, you should feel sorry for yourselves, a bunch of broke people sympathizing with a rich one.”

The insults in the chat became even more intense.

George checked his A’s status, his face turned pale instantly.

The entire module was completely paralyzed, no matter how he tried to deal with the dark material on the official website, it was still there.

That bastard Wayne, he actually used such means!

“You’re right about one thing” At this point, the silent Cory suddenly spoke up.

“I really don’t care about this money” Cory said coldly. “But it’s not because my family is rich, it’s because I can earn so much myself.”

George’s mouth twitched.

“Sat you’ve really pissed me off. Since you want to sue me, does that mean the competition just now doesn’t count?” Cory didn’t give George a chance to reply, he coldly said, “In that case, such a trash product doesn’t need to exist

George was taken aback.

“Don’t you firmly believe that I have no ability and all my moves were directed by my team members?”

While speaking, Cory raised his hand and turned the camera to his keyboard and screen.

“Just watch”

As soon as he finished speaking, his fingers began to type rapidly on the keyboard.

On the computer, lines of code started scrolling fast.

“What are you doing?”

George gradually felt something was off and immediately asked.

“What else could he be doing? The silent Rosalynn said, “Obviously he’s proving to you that he’s not the incapable kid you said he is.”

In the comment section, “Wow!! It’s Secretary Tesdal, her voice is so pleasant, President Silverman is so lucky!”

“So awesome!!!”

On the other side, Raleigh, who was very angry just now, had now turned into a commentator.

Chapter 1228

Raleigh was enthusiastically dissecting Cory’s coding, and George was getting more and more anxious. “Alright, I’m not gonna push you anymore. I believe you can solve this problem, and let’s call it a day!”

“Just because you started it, doesn’t mean you can end it whenever you want Rosalynn replied with a smile. “My son is clearly not done playing around yet. You made your own bed, now you gotta lie in it.”

“You’re the parent here, why can’t you teach your kid to do good things!” George was getting agitated.

He had just got a message from the data center, saying that they were beginning to experience a small scale malfunction.

“It’s funny you say that, I didn’t go complaining to your mom about how she didn’t teach you to do good things, but here you are giving me grief

The chat was going wild with laughter.

“I never knew Secretary Tesdal was so good at throwing shade!”

“She is so cuter

“She’s roasting him without using swear words, haha!”

“I give up, okay? Can I surrender now?” George was getting more and more desperate.

But Cory remained expressionless, swiftly working on the computer with no intention of stopping.

Until George received a message that the data center was completely paralyzed.

He laughed out of pure frustration.

“Fine! Go ahead! Bully me because you’re rich! If you want to give me money, I’m more than happy to take it! See you in court!”

After George ended the call, Cory still didn’t stop.

The chat started asking Rosalynn why Cory wasn’t stopping

Rosalynn helplessly replied, “I don’t understand what he’s up to.”

She didn’t understand, but Raleigh did.

Soon, someone posted Raleigh’s explanation.

“In Raleigh’s words, in short... Tech Seven is really planning to completely obliterate his source code, making this module extinct!”

He was planning to permanently delete it.

Cory had no intention of leaving any trace for George

“Holy crap! I’m being outshone by a five-and-a-half-year-old!”

“Am I the only one worried about the legal risks here?”

“Didn’t he just say he’s going to make money off it? Don’t forget he’s Tech Seven!”

“Anyone worried here probably doesn’t know how strong Bane Corporation’s legal team is. And by the way, the Jared Group’s legal team has never lost a case in corporat warfare!”

“So, the question is, who would win the lawsuit between Bane Corporation and the Jared Group?”

“That’s a dangerous question, man! What kind of lawsuit could Bane Corporation and the Jared Group possibly have?”

“Haha, for instance, what if the wealthy Secretary Tesdal fell in love with me and wanted to marry me? Wouldn’t that involve divorcing Wayne? Wouldn’t that lead to a lawsuit?”

Cory, who had been typing rapidly, glanced at the screen, then freed up a hand to move the mouse and mute the guy who said he wanted to marry his mom

The camera was on the screen, so everyone saw the process and immediately burst into laughter.

“Serves you right for trying to wreck a marriage!”

“Wow, Tech Seven is so cool! I wish my future child can be as smart as him!”

“Wasn’t it said before that Secretary Tesdal’s kids don’t like Wayne? Aren’t he just protecting his dad?”

Chapter 1229

Wayne was on his way home, He popped into a live stream and everything in front of him made him feel good.

He was constantly showering Cory with gifts.

Everyone watched as the excitement on the live screen ramped up, but this hubbub didn’t last long

Cory frowned and blacklisted his father.

After blacklisting him, he simply explained: “I don’t hate him, he’s just too noisy

“There’s no sound in the live stream, where’s the noise? The comments were full of confusion.

“He’s hurting my eyes with his noise, Cory replied.

The viewers burst into laughter after hearing this.

At this point, George’s call came through to Raleigh.

“Boss Chen, I know I’ve been a bit reckless this time, can you find Tech Seven and let bygones be bygones? This project is the fruit of our entire team’s hard work, not just mine!”

“Once this kid gets angry, not even his parents can stop him, I can’t do anything about it Raleigh responded, “George, he’s not denying you a chance, you should see that other people’s kids are already doing well, you should accept defeat. After a while, people will forget about this, why do you insist on making these moves?”

George wanted to say something. He initially didn’t believe that a kid could have such abilities.

Especially since this kid was Wayne’s son.

Back then, he made some mistakes in H country, and as a result, Wayne kicked him out of the Silverman Group

This incident made George harbor a grudge. He couldn’t accept that Wayne had such a smart kid.

“Boss Chen, I really didn’t expect that kid to be so capable. This time, I really overestimated myself and underestimated him, can you talk to him for me? if he continues like this, my entire server room is toast!”

“Weren’t you the one who wanted to go through legal proceedings? Tech Seven has plenty of money, let him pay!”

Raleigh would never try to persuade Cory.

Cory is a level-headed person. If George could disgust him, it shows how shameless George is

How could he help such a bad person?

Especially since during the live stream, this guy was constantly mocking him and his teammates.

“Fine! You’re all good people!”

After George said this, he hung up the phone.

Almost simultaneously.

The last server in his room announced its collapse.

After leaving the Silverman Group and experiencing many difficulties back in H Country.

The business he had painstakingly built was easily destroyed by a kid

His iPad was still playing this kid’s live stream.

He pulled his hand back, exhaled gently, and then looked at the camera.

“Senior, I’m waiting for your claim.”

After saying this, his attitude softened a bit.

“That’s it for today’s live stream.....”

He glanced at the comments and shook his head.

“No more math problems.”

At some point, the comments were filled with all sorts of math problems.

Seeing this, even Rosalynn couldn’t help but laugh.

“Alright, guys, it’s bedtime for him now. If I get the chance, I’ll do another live stream and solve more math problems for you.”

The comments were filled with messages of reluctance, and some were calling out loud.

Tech Seven is going to bed, his mom doesn’t have to go to bed so early, right?!”

“Secretary Tesdal, keep chatting! Stay a little longer

After Cory left, right before Rosalynn ended the live stream, she saw the messages in the comments.

She smiled-gently “There’s a summit in a few days, I’ll be there. We’ll chat then, bye everyone.”

Chapter 1230

Then, Rosalynn wrapped up the live stream

And this shocking event tonight had spread like wildfire on the internet.

“Seriously guys, don’t go overboard. Just yesterday it was all rumors, and today you’re spreading it like it was a fact?”

“I just got off work, grabbed some takeout, and logged on, only to feel like I’m in a whole different world. A fire and a half year old IT mogul? Twins? Are you guys discussing some cheesy romance novel plot?

As the person was in disbelief, someone had edited a video of Tech Sever’s entire process of defeating his opponent, added some music, and posted it online

“Is this some kind of TV show?”

“OMG, I was there just now. Looking back, I still can’t believe my eyes!”

“Why is it that other people’s kids are geniuses at five and a half, and here I am at twenty-five and a half, struggling for my meager salary?”

“George is really out of lime. He wanted to compete and humiliate the kid, but when he lost, he wanted the other side to pay. Tech Seven is really admirable!”

“His mom was with him the whole time, and she spoke so gently. She must be a beautiful person!” Some people who weren’t into internet stuff, clicked on the trending top just because it was IT related

Many people made such comments after watching

Then, the comment section of the video was filled with Secretary Tesdal from different times.

“So is his mom a star? She’s really beautiful!”

Someone seeing this quickly explained, “No, not a star, she’s a female entrepreneur, the heiress of the Jared Group!”

On the other hand, George tried to salvage his product.

But Cory went all out, leaving no room for mercy

This was his first time doing so, not only because of George’s provocation, but also because of his past bad remarks about Rosalynn.

After failing to save his website, George started playing the victim online.

“I don’t understand. We were just competing. Why did he have to be so ruthless? He’s so young and already so bad. He’ll definitely be a menace to society when he grows up!”

He quickly deleted this post and posted another one: “My hard work of over a decade was ruined overnight. He’s so ruthless at such a young age!”

He didn’t delete this one, but the comments were all mocking him,

“Right, right, you made a mistake and blame others for being ruthless!”

“It’s hilarious, if I had Tech Seven’s skills, I would do even worse if you provoked me like this!”

“Getting angry because you’re not as good, now playing the victim after being defeated!”

“Trashy website got dealt with, what’s there to be emotional about? Didn’t he tell you to go sue him for compensation?”

“I had a fight with my wife yesterday because of you and got kicked out of the house, and you turned out to be this kind of person!”

“Refund! Refund!!”

George spent a long time scrolling through the comments, not a single one was in support of him.

Angrily, he deleted the tweet, but there were still people cursing him under other tweets.

He simply shut down the comment section and called his lawyer.

If he was to go against the legal teams of Bane Corporation and the Jared Group, he would need the top-notch lawyers.

However, after several calls, George was rejected outright by the other party before he could even state his demands.
