Read I Am A Quadrillionarire Chapter 2473

I am a quadrillionarire chapter 2473-Originally. Valentin thought it would be the Soul Devourers.

Unexpectedly, it was the Lv 6 of the Robotias.

Being familiar with the Robotias, Valentin didn't panic.

He had never fought against the Soul Devourers. He only knew that the Soul Devourers had weird methods that would make people hard to guard against them, so he had no idea what to do.

On the other hand, Valentin had fought the Robotias more than once.

He was very confident with this familiar enemy.

He could definitely stop them.

Just as the two sides were about to collide, Valentin drew out his weapon, ready to confront the opponent head-on.

Meanwhile, the Overlord Realm equivalent Robotia Lv 6 showed a creepy smile.

Then, a mechanical sound sounded.

"The five Leila rulers should die!"

Immediately, a berserk force appeared in the Robotia Lv 6's body, and it exploded instantly.

Then…

Boom!

A huge explosion could be heard.

At the center of the explosion, a super huge black hole appeared and expanded in all directions.

Layers of space barriers were torn apart by the huge force of the explosion.

Not even Sylvio and Lufian expected this, let alone Valentin.

The Robotia Lv 6, equivalent to an Overlord, chose to self- destruct!

How powerful was an Overlord's self-destruction?

Even though it was separated by a long distance, it quickly spread to the planet below.

The scope of the black hole soon expanded to where Lufian and others were, about to swallow them up.

The sudden accident interrupted the array that was barely being maintained.

"No! Elora, run!" Lufian shouted frantically with red eyes.

Still to no avail.

If the planet was ruined, it would be hard to maintain the array.

Despite Lufian and Drogo's unwillingness, they had no choice but to stop maintaining the array and respond to the power generated by the Overlord's self-destruction.

From the Robotia Lv 6's self-destruction to everything being swallowed, it only took a short while.

Sylvio was devastated, watching all this from afar, but he could not do anything. He was restrained by Stark and could not move.

"Stark, you sacrificed so much letting the Robotia Lv 6 self- destruct to destroy Elora's restoration," Sylvio said, holding back the anger in his heart.

"Hehe, it's alright! Back then, Elora also self-destructed so we're just retaliating. Now, we're even." Stark laughed.

"You can make an Lv 6 of the Robotias self-destruct.

Although we failed to restore Elora's body this time, we didn't suffer any losses."

"Really? Sylvio, do you know that the self-destructed Robotia Lv 6 is actually defective?"

"What do you mean?" Sylvio was taken aback.

"Simple! This Lv 6 was first produced by the Robotias' mother brain. It has many defects and flaws so it's considered a test product. That's why we used it for selfdestruction. Otherwise, do you think the Robotias will be so generous? Do you still think that you didn't suffer any losses this time? Haha!"

"You rascals!" Sylvio could not hold back the anger in his heart anymore and cursed.

"Hahaha! Sylvio, I love seeing you hate me but helpless to do anything. We will pay back the damage you caused to the Soul Devourers slowly but surely."

Boom!

There was a loud noise.

Sylvio's secret accumulation of power had been completed so he broke free from Stark's restraints.

"Stark! How dare you trespass on the boundary of Leila. I will kill you today!" Sylvio stared at the shadow in front of him and said through gritted teeth.

"Sylvio, you can't!" Stark was not afraid at all.

"We'll see if I can!"
