

Read I Am A Quadrillionaire Chapter 2476

I am a quadrillionaire chapter 2476-Whoever located Zwei Star could find a way to dominate the universe.

Countless people have tried, hoping to find Zwei Star and become the ruler of the vast universe.

Unfortunately, no one had succeeded thus far.

It was said that someone once saw Zwei Star from a distance, but when he approached it excitedly, he lost all trace of it.

Sylvio's hands kept moving the illusory star map in front of him.

He was so fast that it was almost hard to see with the naked eye. Sweat gradually appeared on his forehead as well.

It was pretty taxing to cast Zwei Arithmetics.

Especially now that Sylvio was injured.

He was also seriously injured in the battle with Stark.

The location of Zwei Star was also constantly changing so Sylvio kept his eyes fixed on it.

Not long after, he let out a long exhale and stood up. The illusory starry sky in front of him disappeared.

Seeing this, Lufian immediately approached.

Valentin and Drogo followed quickly.

"Sylvio, how was it? Have you found Elora's whereabouts?" Lufian asked impatiently.

"Yes," Sylvio nodded.

"How is she now? Is she seriously injured? Where is she? Sylvio, please tell me quickly so I can get her right now." A series of questions came out of Lufian's mouth.

He was very worried about Elora's safety.

After all, she was a soul. In addition to the failure to restore her body and being affected by the self-destruction of the Overlord Robotia, it must be very difficult for her.

Maybe she was very seriously injured too.

So, this was the time she would need him a lot.

"Lufian, although I have found Elora's whereabouts through Zwei Arithmetics, I think you should stop looking for her for now," Sylvio suggested after thinking a while.

He already knew the approximate location of Elora, and, because of this, he advised Lufian not to go after her.

According to Zwei Arithmetics, Elora was in The Spirit Cage again, and there was another huge opportunity waiting for her.

If Sylvio's guess was correct, this should be connected to David.

That was why Lufian was advised not to go after her.

Otherwise, he might ruin this opportunity.

Of course, Sylvio was also doing this out of selfishness.

Lufian's strength could not be underestimated.

Judging by how he had single-handedly maintained the output of three people and maintained the movement of the formation, he might have reached partial Heavenly Overlord Rank.

Meanwhile, Zwei Arithmetics could not even read David.

Both of them were inextricably linked to Elora.

Therefore, no one could predict what would happen if the two met.

Anyway, they would not sympathize with each other or shake hands to make peace.

There was a high probability that it would even cause serious internal friction in Leila.

Logically speaking, David couldn't win against Lufian's partial Heavenly Overlord Rank.

However, the problem was that David was immune to Zwei Arithmetics.

So, Sylvio did not dare to draw any conclusions.

He could only try to prevent the two from meeting.

Even if he could not stop it, he had to delay it for a while.

Not when the Soul Devourers and the Robotias were joining forces!
