

Read I am a quadrillionaire chapter 2564

I am a quadrillionaire chapter 2564-In his heart, Elora was number one.

Everything else was not important, including the whole of Leila.

Boom!

A devastating energy erupted from Lufian's body.

The surrounding void made a groaning sound.

"Robotias, you bastards, come out and accept your death! Today is the day you will be wiped out!" Lufian yelled.

His sound pierced the void and reached the Robotias' lair.

The mother brain responded immediately.

"Attack with all your strength and kill this person!"

Then, densely packed Robotias charged at Lufian.

The Robotias' tiny bodies began to assemble.

They formed into more than a dozen super huge mechanical monsters of different shapes and encircled Lufian.

These mechanical behemoths were flawlessly assembled to form a whole unit.

Although not as big as the mother brain, they were nevertheless extremely huge.

Especially five of them.

The main bodies were made from the Lv 6 Robotias that were equivalent to Overlords, so they were much larger than the others.

In other words, the Robotias' mother brain created five Overlords.

No, it should be six.

The first one had a flaw, so it blew up after it destroyed Elora's body during her restoration.

The remaining five had perfect Overlord Realm combat power.

The strength of the Lv 6s had reached Overlord Realm. After the assembly, their strength would skyrocket again.

Of course, no matter how much their strength rose, they still could not reach Heavenly Overlord Rank.

Those were the weapons of war created by the Robotias' mother brain after devouring the entire level 8 civilization.

They were its masterpieces.

If it devoured the entire Leila, it could make even more.

Lufian seemed pitifully small in front of those super behemoths.

"Human, do you know where you are?" A mechanical monster asked.

"Of course, I know! This is the Robotias' cemetery and all of the Robotias will be buried in this void." Lufian showed a

chilling smile.

"What a shameless boast! We haven't gone to Leila to cause trouble for you and yet you've come to us. In this case, I will kill you first today and then invade Leila so that Mother can feast and create more of us. It won't be long before the Robotias spread to all realms of the universe and become the true master of the universe."

The 'Mother' that the mechanical behemoths spoke about was naturally the mother brain of the Robotias.

It was also the capital for the Robotias to move unhindered across the universe since it could continuously devour resources and create countless Robotias.

"With that measly strength of yours? Come here and accept your death!"

“Go! Kill that human and open up a new territory for Mother!” A mechanical behemoth shouted.

Then, more than a dozen huge monsters tightened their encirclement and quickly approached Lufian.

Lufian’s small body was trapped in the middle. He was like a leaf in the ocean that was constantly thrown by the waves and in danger of sinking at any time.

Facing the attack of dozens of the Robotias’ strongest mechanical behemoths, Lufian did not show any panic as he should.

Just as a dozen mechanical behemoths got close to him, Lufian said calmly, “Today, I will use the moves that Elora used against you to eliminate you. So, it can be regarded as getting some justice for her.”

When he finished speaking, he suddenly shouted, “Overlord Inferno!”

A ray of flame, with Lufian as the center, spread rapidly. Almost instantly, it enveloped the mechanical behemoths.
