

Read I am a quadrillionaire chapter 2567

I am a quadrillionaire chapter 2567-The Robotias' Mother controlled a gigantic tentacle and struck at Lufian.

Meanwhile, Lufian transformed into a golden figure of equal size and approached it without any fear.

Boom!

The two collided, making a sound that made the universe void tremble.

Except for the remaining two Lv 6s, the surrounding Robotias were all smashed to pieces.

The Lv 5s were no exception even though they were equivalent to Deities.

They had not gotten rid of the golden flame cast by Lufian, so how could they resist the shockwaves of such a powerful collision?

The battle only took a moment but, out of the countless Robotias that were dispatched, only two Lv 6s remained. The rest were wiped out.

Such a loss was immeasurable.

Even the Robotias' Mother, who could create unlimited Robotias, was heartbroken.

However, it did not have time to pay attention to this now.

At the moment of the collision, Mother felt the powerful threat brought by the human in front of her.

This person was by no means an ordinary Overlord.

No wonder he dared to single-handedly cause trouble to the Robotias.

It seemed that he was pretty confident.

After its blow was blocked, Mother wanted to quickly withdraw its tentacle. At the same time, it swung more tentacles towards Lufian.

“You want to escape? It's not that easy! Have you asked for my permission?”

Lufian grabbed the retracting tentacle, pulled it back with both hands and shouted at the same time.

“Get over here and accept your death!”

Rumble!

Lufian pulled over the Robotias’ Mother’s huge body by its tentacle.

From a distance in the void, one could see a golden giant fighting with a ball-shaped alien monster covered in tentacles.

The alien monster attacked the golden giant with one tentacle.

After the golden giant blocked it, he grabbed the monster’s tentacles and pulled it over.

Even the Mother of the Robotias did not expect the human being in front to have the strength to pull its body.

At this time, it lost all control and could only move toward Lufian while relying on his strength.

If other people were present, they would never forget what they saw next.

Lufian turned into a golden giant and tightly grasped the Robotias’ Mother’s tentacles with both hands. After he pulled the opponent over, he did not stop but started swinging it.

Just like that, Lufian swung the Mother’s huge body in circles.

The void was shattered wherever it swung. Fortunately, everything around it had been swallowed up, so there was no life. Otherwise, the consequences would have been unimaginable.

There was no way for anyone below Overlord Realm to survive the aftermath of the battle between Lufian and the Robotias’ Mother.

“Hahaha! How’s it, you scrap metal? Are you having fun?” Lufian laughed wildly while swinging the Robotias’ Mother.

Until now, he still had not used all of a Heavenly Overlord’s combat power.

It would be too easy on the Robotias to finish this fight quickly.

Lufian wanted to take his time to kill them so they knew what real fear was.

Suddenly, Lufian no longer felt the weight in his hands. He looked up and saw the body of the Robotias' Mother flying off.

Looking at the broken tentacle in his hands, he realized that it had cut off its own tentacle to escape.
