

## Chapter 1000 A New Method

Leaving Sergio and Jaxtyn's tombs, Liam clutched the primogem rock from Leandro and turned to Shayla.

"Got this primogem rock now. Can I save Julie?" he asked.

Shayla nodded. "Yep, as long as she can morph into a Primogem Warrior, that poison's gonna fade away. I'll fill you in on the method. And then, you can give it a shot."

Liam agreed and headed to Julie's ice coffin with Shayla.

On the way, Shayla briefed Liam on the procedure. It was simpler than he had thought, mainly about channeling the rock's energy to Julie.

Liam took it all in, calming his nerves to tackle the task ahead.

With the primogem rock in hand, Liam gently lifted the lid of the ice coffin.

Julie lay exposed, aging rapidly without the ice coffin's protection.

Not wasting a moment, Liam guided the rock's energy into Julie's frail form.

The energy flowed smoothly, halting Julie's aging process and turning it back, smoothing out her wrinkles.

Relief washed over Liam as he watched Julie rejuvenate before his eyes.

Just when Liam thought he could save Julie. Trouble appeared.

The next second, Julie's body ballooned up, her face lost in the swelling.

It seemed like she could burst any second.

Liam's jaw dropped at the sight. He shot Shayla a furious look.

"What's going on here? You said primogem rock's energy would fix Julie up. Was that all lies?" he snapped.

Shayla was as baffled as Liam. She scrambled to check Julie's condition. But she was stumped. "I swear, I didn't see this coming, Liam," she admitted.

"Julie's condition is special. She had been poisoned before, but her aging speed has been slowed down significantly, unlike regular people. This is enough to prove that her physique is different. That might be why. We shouldn't treat her in an ordinary way!" Shayla added.

Liam eased up on Shayla, realizing she was clueless

Chapter 1000 A New Method  
about the situation, too.

 +120 Points at most

But time was ticking.

If they didn't solve this soon, Julie would be dead.

So, Liam dashed to Julie's side, ready to find out what had gone wrong.

With his knowledge of the human body, Liam quickly spotted the problem.

There was a mighty life force pulsing in Julie's heart, holding back the poison's aging effect.

But now, with the primogem rock's power, the poison's effect was weak. And that life force was overwhelming Julie's body!

Liam's brain kicked into high gear, hunting for a fix.

Then it hit him, a snippet of advice from the Salvation Society president popped into his head. He needed to stay calm and figure out how to take out Julie's heart.

The reason why Liam wanted to take out her heart was to check Julie's condition and think about how to solve this trouble.

But then, he gave up that plan, shaking his head slightly.

It just wasn't feasible, not with Julie fading fast.

Tears welled up in Liam's eyes. He couldn't let Julie

slip away like this!

Suddenly, he locked eyes with Shayla and fired off a question. "Have you got any of that poison with you?"

Shayla blinked, puzzled by Liam's request. She couldn't fathom what he had in mind.

But she didn't press further. If Liam wanted the poison, she wasn't about to argue.

Taking the poison from Shayla, Liam braced himself, then tipped the poison into Julie's mouth.

As the poison slid down Julie's throat, the swelling halted instantly.

Julie's aging had also stopped. It was like the two forces were at a standstill.

Shayla's jaw dropped at Liam's move. She couldn't believe what she had seen.
