

Chapter 1133 Use The Universe Crystal Dew

About ten minutes after he left the Prescott family's team, Liam stumbled upon a secluded, quiet valley.

He had scouted this spot before and knew it was free from any strong shadow beasts.

With a sense of reassurance, Liam retrieved the Cyan Light Lamp given by Susannah and scanned the valley to purge any lurking shadow beasts.

He had big plans for this valley; it was going to be his private sanctuary for absorbing the Universe Crystal Dew, and he didn't want any nasty surprises.

As soon as he sensed some shadow beasts starting to close in on him, Liam smirked and lifted the Cyan Light Lamp.

Enveloped in the lamp's special power of the light element, the shadow beasts were stripped of their concealment and laid bare before Liam's gaze.

Then, Liam sprang into action, striking the shadow beasts with ruthless precision.

He used his special power of the earth element to generate a gravitational field, halting the shadow beasts in their tracks and rendering them immobile. Like the grim reaper, Liam took them all down. None survived his attack.

Then, something else crossed Liam's mind.

He had always believed his special power of the light

Chapter 1133 Use The Universe Cryst  +120 Points at most element would be deadly to the creatures in Shadow Valley. Now was the perfect opportunity to test his theory.

Without any hesitation, he turned off the Cyan Light Lamp. With a determined frown, he concentrated all his mental energy on controlling the release of his special power of the light element.

Although his control over the light element was not yet precise and the effort had left him somewhat fatigued, Liam's own special power of the light element was much stronger than the lamp's.

His special power rendered the bodies of the shadow beasts unmistakably visible, their forms no longer hidden in darkness. What truly thrilled Liam was the realization that his own special power of the light element not only made the shadow beasts' figures clearer but also suppressed them more effectively than the Cyan Light Lamp.

While the Cyan Light Lamp could diminish the beasts' strength by ten percent, Liam's power could slash it down by an impressive thirty percent!

This discovery elated Liam.

He couldn't resist murmuring to himself, "With my light element power, navigating Shadow Valley will be so more manageable! Suppressing thirty percent of a shadow beast's strength, even if I come face to face with a peak sixth-level beast, I stand a good chance of getting away unharmed! And if I manage to absorb the Universe Crystal Dew and boost my strength, I might even take down a peak sixth-level shadow beast with my power!"

The thought sent a surge of excitement through Liam.

For most people, Shadow Valley was a deadly no-go zone,

Chapter 1133 Use The Universe Cryst +120 Points at most
but for him, it was a goldmine.

His special power of the light element was uniquely suited to take on the creatures here.

However, there was a catch. He obviously needed to be strong enough. To handle powerful enemies, even the best strategies wouldn't work if he lacked strength.

After sweeping the small valley one more time to ensure it was free of any shadow beasts, Liam stopped.

He found a quieter spot, sat down, and immediately took out the Universe Crystal Dew.

The instant Liam swallowed it, he felt a surge of coolness wash through him.

As the Universe Crystal Dew's energy moved through his body, it miraculously healed all his underlying injuries.

But that wasn't even the best part.

After coursing through Liam's entire body, the Universe Crystal Dew went straight to his brain, starting to boost his spiritual power!
